SUPPLEMENT TO
REPORT NO.

THIS IS UNEVALUATED INFORMATION

25X1

1. In 1950 the western half of the woods which border Boernerowo, Warsaw, were cut down and a strip about 400 meters wide was cleared. The remaining half of the woods, also about 400 meters wide, was left standing, and storage bunkers were built several stories underground. Most of the storage dumps have been completed; large quantities of ammunition and explosives are now being stored there. Work on the storage dumps is being done by Russians.
2. Numerous truck columns have been observed transporting construction supplies to the area via three roads. Underground bunkers are being built in the cleared area as well as in the woods, but all work is centered in the wooded area in order to camouflage the entire project.
3. There are also supply dumps near the road to Warsaw in an underground bunker which dates from before World War II. Large quantities of ammunition are being stored there. Both areas are heavily guarded. In the near future, the area is to be fenced off to prevent unauthorized persons from entering the area. Part of the fence had been erected by March 1952.
4. A Russian in Boernerowo stated that the Russians were considering resettling all the inhabitants of Boernerowo.
